Professional Experience

Web developer Intern

Schools Division Office of Quezon City | HR-Nonteaching Department

January 2026 – April 2026

- Built an automated Daily Time Record (DTR) system to replace manual attendance tracking and improve department efficiency.
- Upgraded the system's backend from core PHP to Laravel to improve performance and scalability.
- Conducted rigorous regression testing during the backend migration from core PHP to Laravel to validate system performance, security, and data integrity.
- Provided comprehensive IT and hardware support for standardized examinations at Quezon City Science High School.

Projects

- Web Application Migration & Database Design
- Designed structural database schemas using MySQL and migrated legacy systems to the Laravel framework to improve backend efficiency and scalability.
- Utilized GitHub for version control and XAMPP for local environment testing.

Certifications

- **(Certiport)** Information Technology Specialist in Cybersecurity
- **(Certiport)** Information Technology Specialist in HTML and CSS
- UE manila Programming skills and Evaluation (2025)
